PROFESSIONAL SUMMARY

Computer Science graduate (2026) with hands-on full-stack development experience using MongoDB, Express.js, React.js, and Node.js (MERN). Built and shipped responsive front-end interfaces, RESTful backend services, and role-based, database-driven web applications across two software development internships and a portfolio of independent full-stack projects. Comfortable working in Agile teams with daily standups, collaborating across design and engineering to deliver production-ready features. Strong foundation in JavaScript (ES6+), clean code practices, and third-party API integration, with a fast-learning track record and eagerness to grow into cloud and DevOps tooling.

EDUCATION

Bachelor of Science in Computer Science

2026

Shaheed Zulfiqar Ali Bhutto Institute of Science and Technology (SZABIST), Islamabad

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js

Languages: JavaScript (ES6+), C++, Python (Basics)

Frontend: React.js, React Native, Next.js, Redux Toolkit, Tailwind CSS, Material UI, HTML5, CSS3

Backend & Databases: Node.js, Express.js, RESTful APIs, MongoDB, MySQL, Supabase, Google Firebase

Practices & Collaboration: Agile/Scrum (daily standups), Code Reviews, Git/GitHub, Version Control

UI/UX & Design: Figma, Wireframing, Prototyping, Responsive Design

Tools & Platforms: Git/GitHub, Vercel, Postman, VS Code, MS Word/Excel/PowerPoint/Access

EXPERIENCE

Intern Front-End Developer / TMR Consulting (Onsite)

June 2025 – August 2025

- Built Novelerio, a responsive book-sharing web platform, using React.js, Tailwind CSS, Material UI, and Redux Toolkit, ensuring cross-browser and mobile compatibility.
- Collaborated with designers and engineers in an Agile workflow with daily standups to translate wireframes into intuitive, accessible user interfaces.
- Implemented efficient state management with Redux Toolkit, improving app responsiveness and reducing page load times.
- Optimized front-end performance and navigation flow, contributing to improved overall user satisfaction.

Intern UI/UX Designer / Daybie (Remote)

August 2024 – October 2024

- Designed and prototyped a mechanic-service mobile application in Figma, focusing on clean layouts and intuitive navigation.
- Created wireframes, user flows, and interactive prototypes to validate usability ahead of development, working within a daily-standup Agile process.
- Partnered with mentors to iterate on designs based on feedback, applying UI/UX best practices and design systems thinking.

- Contributed design input, ideas, and feedback for community events and open-source projects within a global developer community.
- Participated in workshops, hackathons, and tech talks focused on UI/UX, Android, and web development.
- Led community outreach efforts, promoting tech education and onboarding new members with shared learning resources.

PROJECTS

Smart Ride-Sharing App (University-Scale) — *React Native, Expo, Node.js, Supabase, OpenStreetMap, Leaflet*

- Built a cross-platform ride-sharing system — rider app, driver app, and admin web console — to solve last-mile commute friction for a university-scale user base.
- Engineered a real-time driver-matching engine with a Node.js backend and Supabase Realtime, synchronizing live trip state across rider, driver, and admin clients with low latency.
- Implemented live route tracking and ETA calculation with OpenStreetMap and Leaflet, plus custom routing and geocoding flows.
- Integrated a third-party AI chatbot API for rider support and multilingual translation, alongside an admin monitoring dashboard for trips, users, and feedback.

Novelerio: Story & Book Reading Platform — *React.js, Tailwind CSS, Node.js*

- Built a role-based story publishing platform with separate user, author, and admin dashboards to support a structured digital reading and publishing ecosystem.
- Engineered an authentication-gated reading system and an author onboarding flow with admin approval, enabling controlled access for verified writers to manage books and chapters.
- Implemented chapter-level content control and a responsive Tailwind CSS UI focused on readability and scalable dashboard layouts across all user roles.

E-Mart: E-Commerce Website — *React.js, Tailwind CSS*

- Built a modern e-commerce front-end with product browsing, category-based filtering, cart management, and a structured checkout flow.
- Implemented reusable UI components and dynamic UI state handling for a scalable, responsive shopping experience across devices.

Other Projects:

- Mechanic Service App Prototype — Figma
- Tech Company Website — React.js, Tailwind CSS
- Counseling Website — HTML5, CSS3
- Online Shopping System — C++, MySQL
- Tower of Hanoi Game — C++, C++ Graphics
- Kids Learning Center — C++

LANGUAGES

English (Fluent) | Urdu (Native)

CERTIFICATIONS

- Executive Member, Google Developers Group (GDG) on Campus, SZABIST — 2024–2025
- Participant, Compete'24 UI/UX Design Competition, COMSATS University — 2024
- Internship Completion Certificate, TMR Consulting
- Internship Completion Certificate, Daybie
